

32-36 City Road,
Chippendale NSW 2008.

9 September, 2009

We've been using the Hottop to roast the green bean samples by which we select the coffees Toby's Estate will buy. When you choose 18 tons of coffee based on a 300 gram sample, it's very important to get an excellent roast! The Hottop **consistently delivers a clean, even and flexible roast profile**, and can be set up for use in no time at all. We love it, and happily recommend it to the home roaster.
